Check if Relation is a Function (12 pts classwork, version 19)

1. A relation is expressed as a list of (x, y) ordered pairs.

$$(6,4) \quad (3,6) \quad (9,4) \quad (4,8) \quad (3,6) \quad (2,7) \quad (8,3)$$

- Is this list consistent with y being a function of x? Why or why not?

yes

- Is this list consistent with x being a function of y? Why or why not?

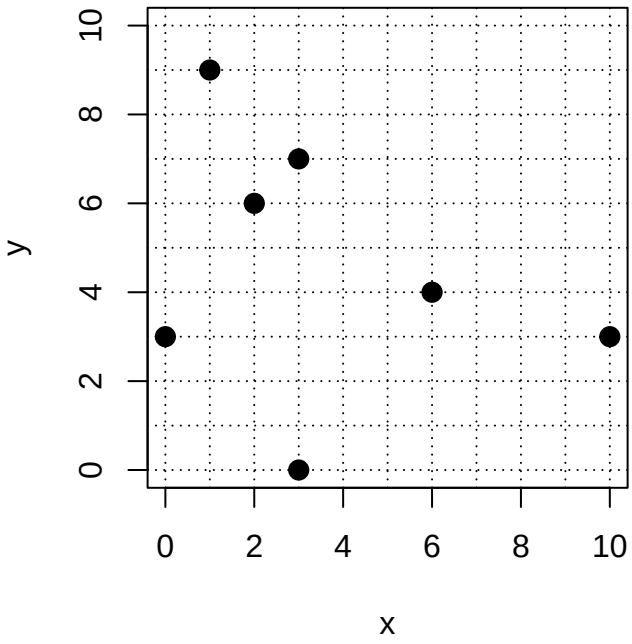
no

- Is this list consistent with a one-to-one function? Why or why not?

no

---

2. A relation is shown as points on a graph.



- Is this relation consistent with y being a function of x? Why or why not?

no

- Is this relation consistent with x being a function of y? Why or why not?

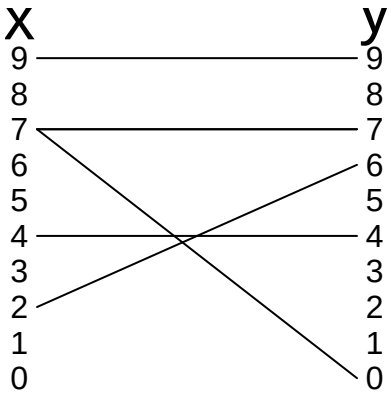
no

- Is this relation consistent with a one-to-one function? Why or why not?

no

Check if Relation is a Function (version 19)

3. A relation is shown with segments connecting elements of two sets.



- Is this relation consistent with y being a function of x? Why or why not?

no

- Is this relation consistent with x being a function of y? Why or why not?

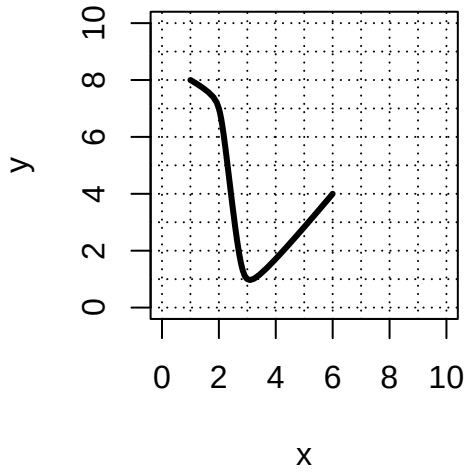
yes

- Is this relation consistent with a one-to-one function? Why or why not?

no

---

4. A relation is shown as a curve plotted on an x, y



- Is this relation consistent with y being a function of x? Why or why not?

yes

- Is this relation consistent with x being a function of y? Why or why not?

no

- Is this relation consistent with a one-to-one function? Why or why not?

no
