Check if Relation is a Function (12 pts classwork, version 33)

1. A relation is expressed as a list of (x, y) ordered pairs.

$$(2,4) \quad (5,5) \quad (9,1) \quad (7,6) \quad (9,1)$$

- Is y a function of x? Why or why not?

yes

- Is x a function of y? Why or why not?

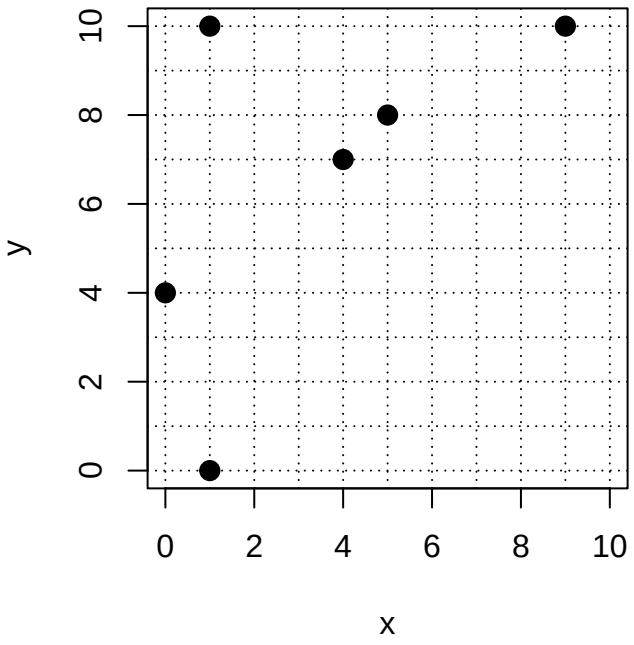
yes

- One-to-one function? Why or why not?

yes

---

2. A relation is shown as points on a graph.



- Is y a function of x? Why or why not?

no

- Is x a function of y? Why or why not?

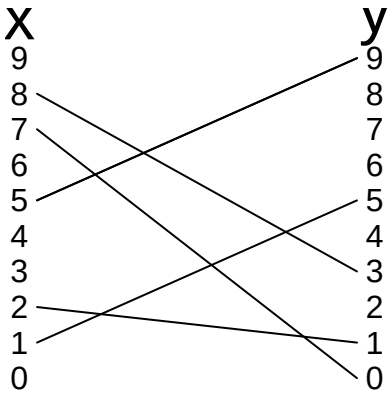
no

- One-to-one function? Why or why not?

no

Check if Relation is a Function (version 33)

3. A relation is shown with segments connecting elements of two sets.



- Is y a function of x? Why or why not?

yes

- Is x a function of y? Why or why not?

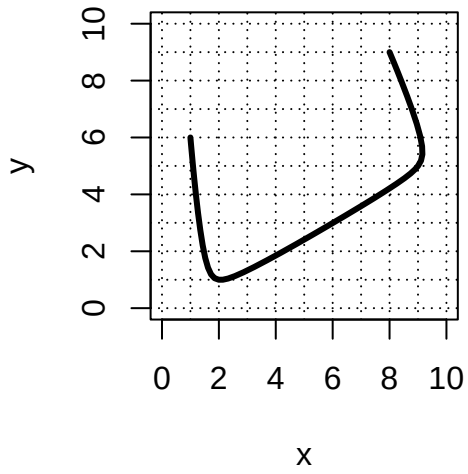
yes

- One-to-one function? Why or why not?

yes

---

4. A relation is shown as a curve plotted on an x, y



- Is y a function of x? Why or why not?

no

- Is x a function of y? Why or why not?

no

- One-to-one function? Why or why not?

no
