

Name: _____

Date: _____

Exam: Function Reflections (Practice version 22)

1. Let function f be defined by the polynomial below:

$$f(x) = -2x^5 - 3x^4 - 7x^3 + 5x^2 - 6x + 4$$

Draw lines that match each function reflection with its polynomial:

Reflections

$-f(x)$ ●

$-f(-x)$ ●

$f(-x)$ ●

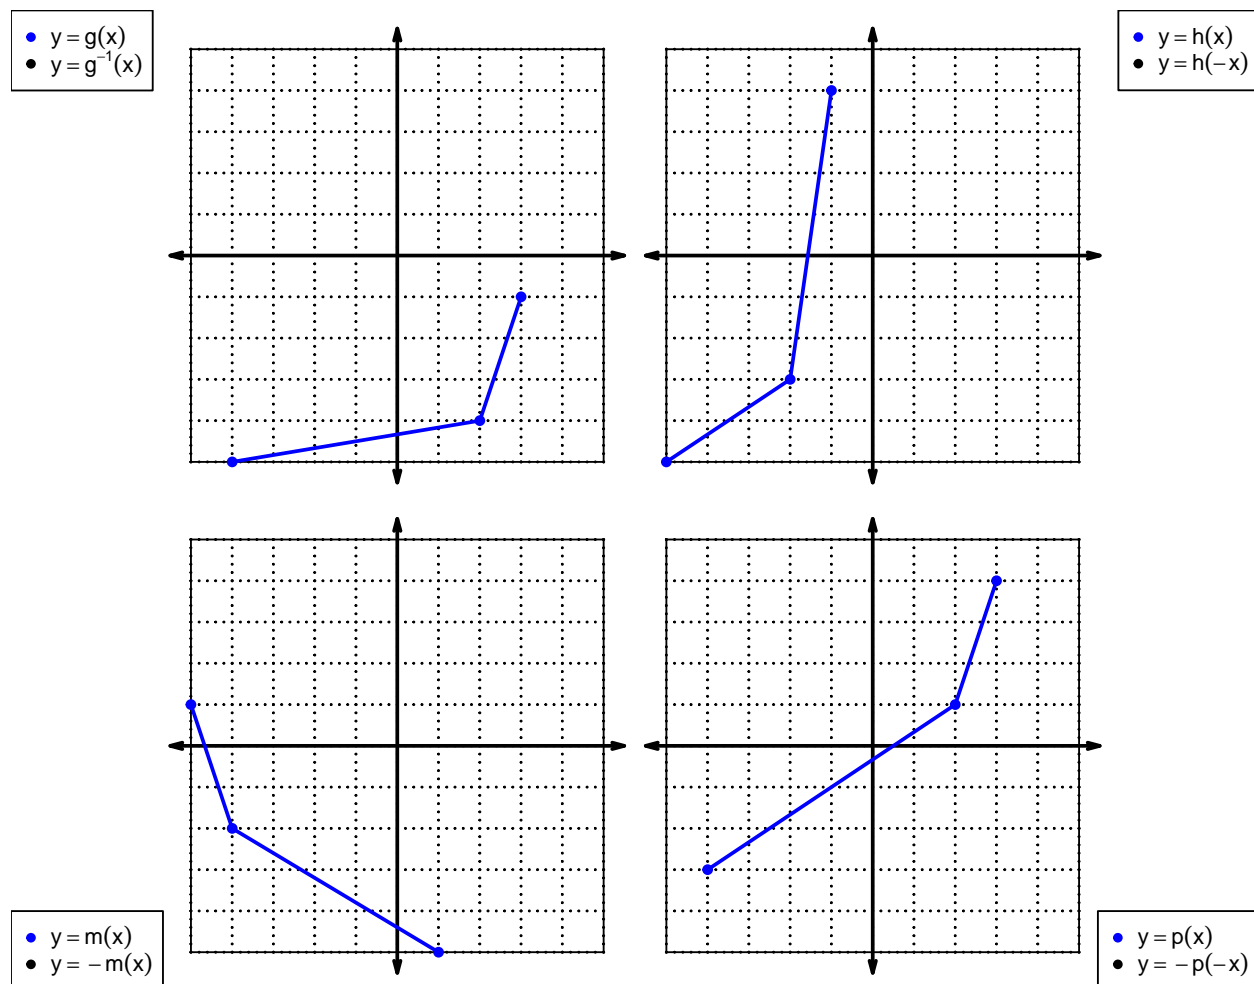

Polynomials

● $-2x^5 + 3x^4 - 7x^3 - 5x^2 - 6x - 4$

● $2x^5 + 3x^4 + 7x^3 - 5x^2 + 6x - 4$

● $2x^5 - 3x^4 + 7x^3 + 5x^2 + 6x + 4$

2. In each xy plane shown below, a function is graphed with blue. Draw the indicated reflections (as a second curve, indicated in legend) with black (or with whatever you have). The x axis is horizontal and the y axis is vertical (as typical), and the scale is equal on both axes.

Exam: Function Reflections (Practice version 22)

For all questions on this page, the functions f , g , and h are defined by the table below.

x	$f(x)$	$g(x)$	$h(x)$
1	8	7	5
2	9	9	4
3	5	2	1
4	1	6	8
5	7	4	6
6	3	8	3
7	6	5	2
8	2	3	9
9	4	1	7

3. Evaluate $f(4)$.

4. Evaluate $g^{-1}(3)$.

5. By filling more rows of the table, it is possible to make function f **odd**. If that were done, what would be the value of $f(-2)$?

6. By filling more rows of the table, it is possible to make function h **even**. If that were done, what would be the value of $h(-9)$?

Exam: Function Reflections (Practice version 22)

7. A function, f , is **even** if $f(x) = f(-x)$ for all x in the domain. A function, g , is **odd** if $g(x) = -g(-x)$ for all x in the domain.

Let polynomial p be defined with the following equation:

$$p(x) = x^3 + x$$

- a. Express $p(-x)$ as a polynomial in standard form.

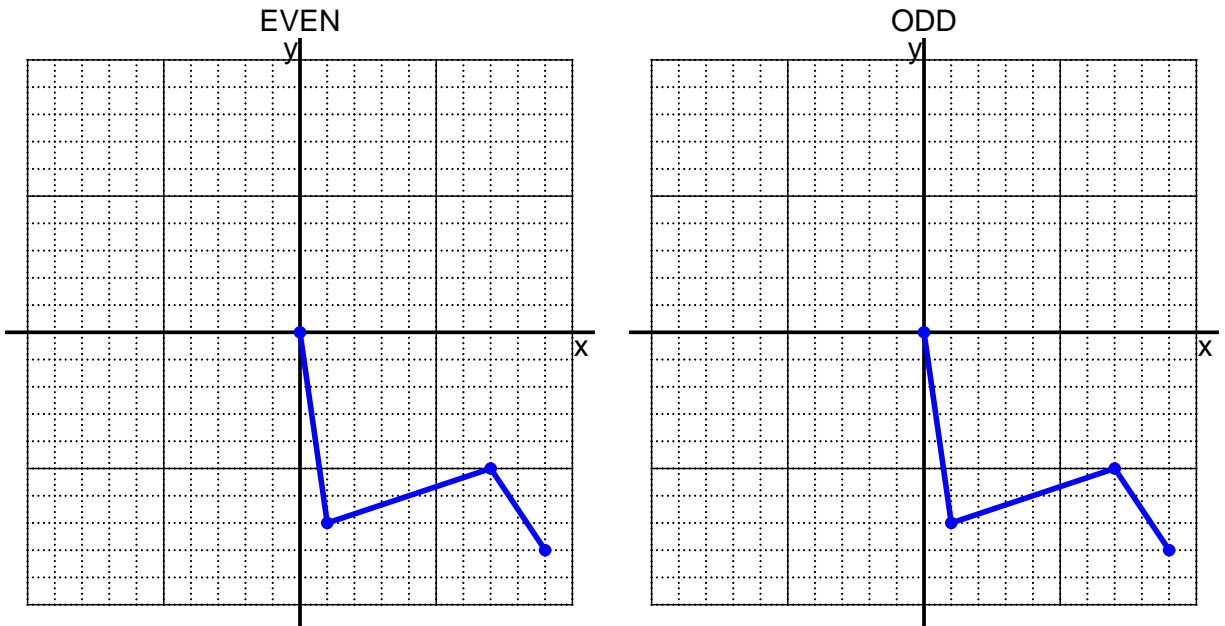

- b. Express $-p(-x)$ as a polynomial in standard form.

- c. Is polynomial p even, odd, or neither?

- d. Explain how you know the answer to part c.

Exam: Function Reflections (Practice version 22)

8. I have drawn half of a function. Draw the other half to make it even or odd.

9. Let function f be defined with the equation below.

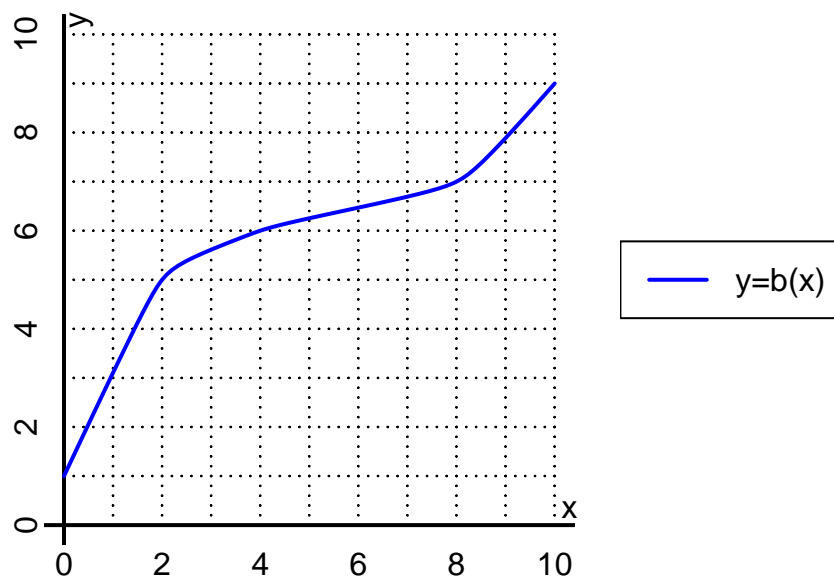

$$f(x) = \frac{x}{5} + 3$$

a. Evaluate $f(50)$.

b. Evaluate $f^{-1}(12)$.

Exam: Function Reflections (Practice version 22)

10. The function b is represented by the curve $y = b(x)$ graphed below.

a. Evaluate $b(4)$.

b. Evaluate $b^{-1}(5)$.

Exam: Function Reflections (Practice version 22)

11. Function f is defined by the table below.

a. Complete the columns for $-f(x)$ and $f(-x)$ and $-f(-x)$.

x	$f(x)$	$-f(x)$	$f(-x)$	$-f(-x)$
-2	3			
-1	7			
0	0			
1	7			
2	-3			

b. Is function f even, odd, or neither?

c. How do you know the answer to part b?
