PCW_09_23: Graphing Function Transformations (version 2)

1. Curve $y = f[x]$ is plotted below.

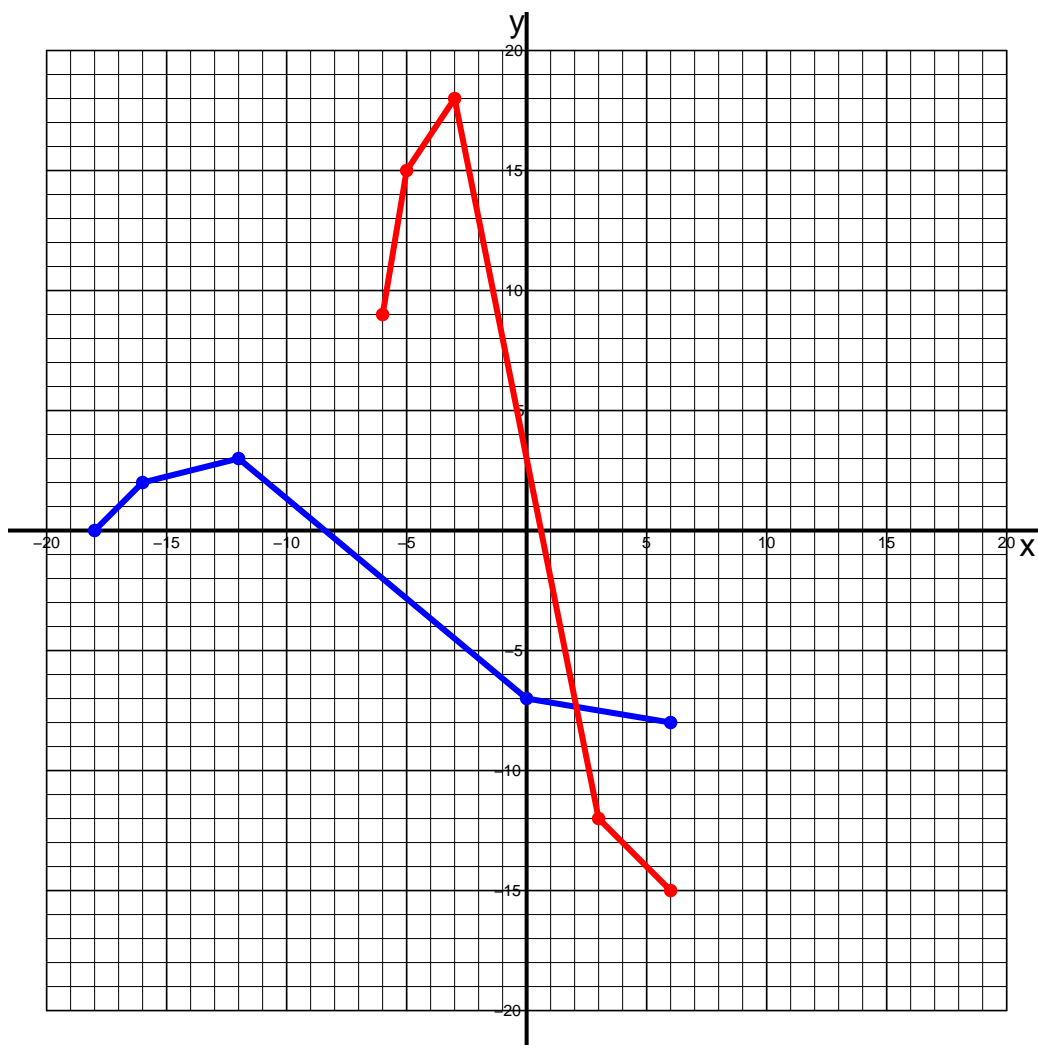

On the same plane, please draw the curve represented by the equation below:

$$y = \frac{f\left[\frac{x+5}{2}\right] - 9}{3}$$

PCW_09_23: Graphing Function Transformations (version 2)

2. Curve $y = f[x]$ is plotted below.

On the same plane, please draw the curve represented by the equation below:

$$y = 3 \cdot f[2x - 6] + 9$$
