PCW__09__29: Graph Parent Translations (version 1)

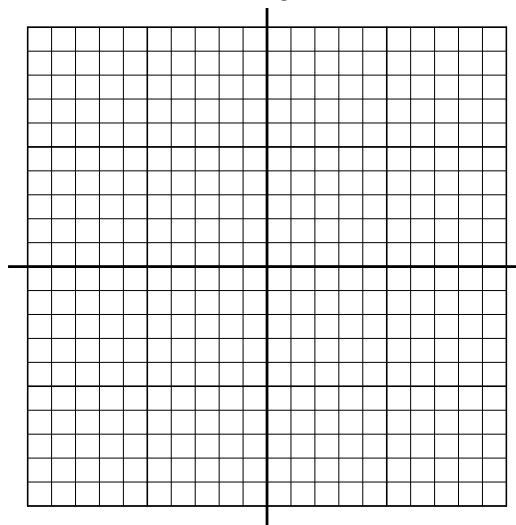

Graph each equation. Let the y axis be vertical and the x axis be horizontal. Also, let both axes be at unit scale, so each goes from -10 to 10 .

Clearly mark every solution where x and y are both integers with a small dot along the curve.

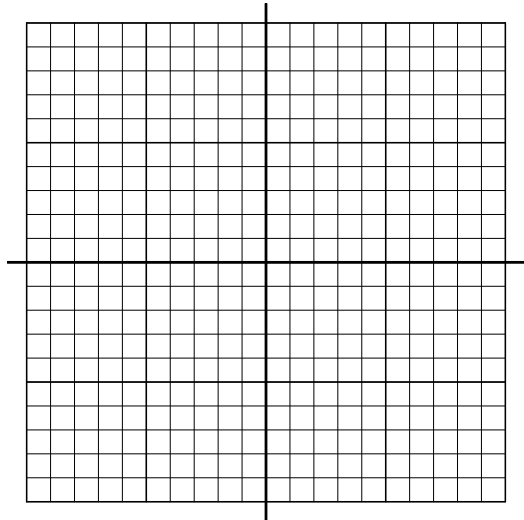

$$y = |x - 2| - 3$$

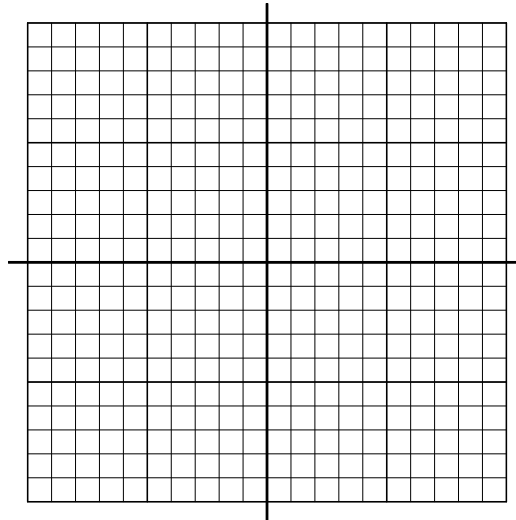

$$y = \frac{1}{x+5} + 1$$

$$y = \log_2(x - 2) - 3$$

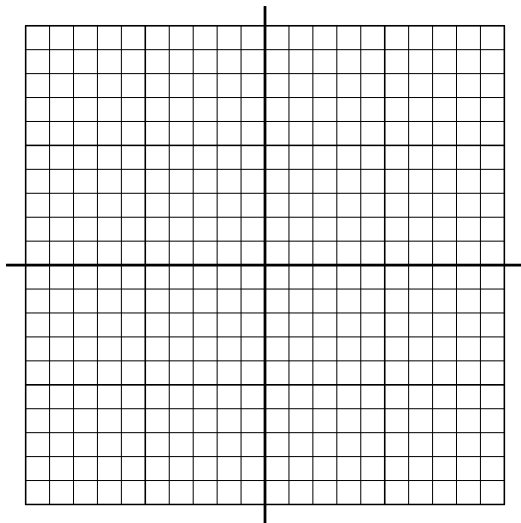

$$y = (x - 5)^2 - 1$$

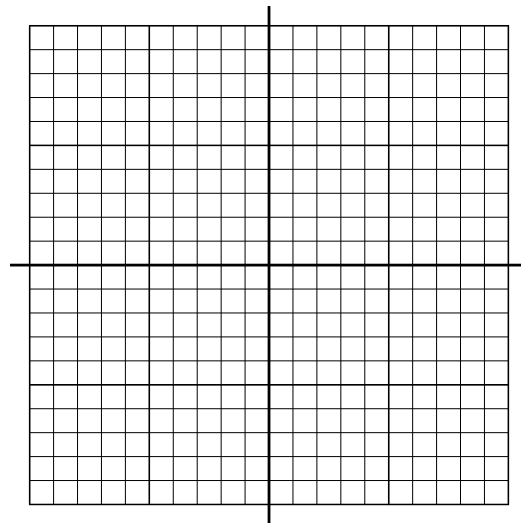

PCW_09_29: Graph Parent Translations (version 1)

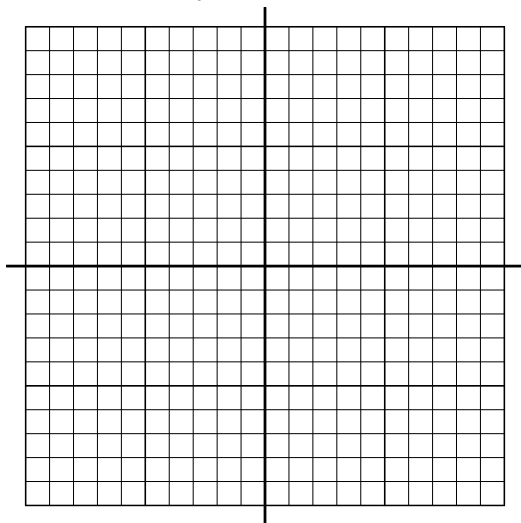

$$y = \sqrt[3]{x+5} + 1$$

$$y = (x-1)^3 - 4$$

$$y = 2^{x+4} + 3$$

$$y = \sqrt{x-2} + 5$$
