Inverse, Even, Odd, Domain, Range Solution (version 121)

1. You've been given part of $y = f(x)$. Sketch the other half to make f **even**.

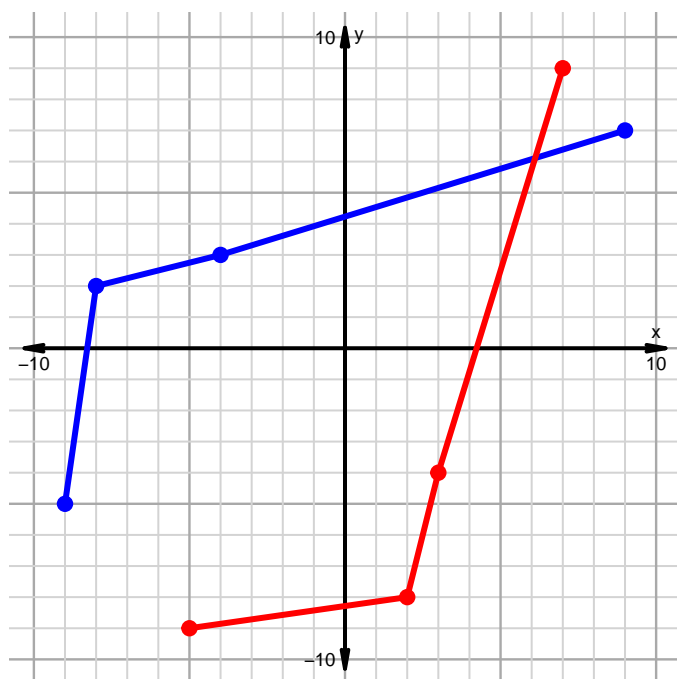

2. You've been given part of $y = f(x)$. Sketch the other half to make f **odd**.

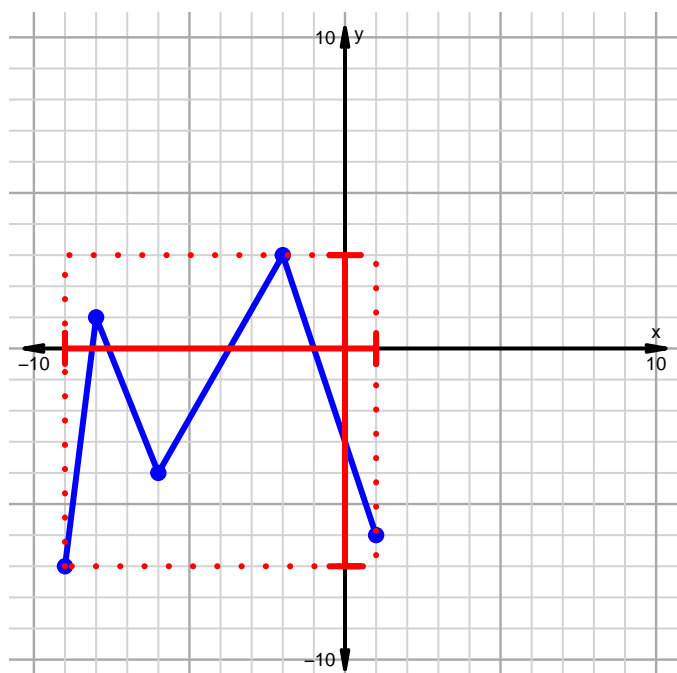

Inverse, Even, Odd, Domain, Range Solution (version 121)

3. You've been given a graph of $y = f(x)$, with a few key points indicated. Please sketch $y = f^{-1}(x)$, where f^{-1} is the **inverse** of f .

4. Find the domain and range of the function shown below.

$$\text{Domain} = [-9, 1]$$

$$\text{Range} = [-7, 3]$$

Note: you do NOT need to draw lines on this last graph. You can just give domain and range.
