

Name: _____

Date: _____

Exam: Function Reflections (Practice version 27)

1. Let function f be defined by the polynomial below:

$$f(x) = -3x^4 - 7x^3 - 2x^2 - 4x - 5$$

Draw lines that match each function reflection with its polynomial:

Reflections

Polynomials

$f(-x)$ •

• $3x^4 - 7x^3 + 2x^2 - 4x + 5$

$-f(-x)$ •

• $3x^4 + 7x^3 + 2x^2 + 4x + 5$

$-f(x)$ •

• $-3x^4 + 7x^3 - 2x^2 + 4x - 5$

2. In each xy plane shown below, a function is graphed with blue. Draw the indicated reflections (as a second curve, indicated in legend) with black (or with whatever you have). The x axis is horizontal and the y axis is vertical (as typical), and the scale is equal on both axes.

Exam: Function Reflections (Practice version 27)

For all questions on this page, the functions f , g , and h are defined by the table below.

x	$f(x)$	$g(x)$	$h(x)$
1	9	9	7
2	8	1	4
3	6	5	1
4	1	3	3
5	2	4	8
6	7	8	5
7	5	6	2
8	4	7	9
9	3	2	6

3. Evaluate $f(3)$.

4. Evaluate $g^{-1}(2)$.

5. By filling more rows of the table, it is possible to make function g **odd**. If that were done, what would be the value of $g(-4)$?

6. By filling more rows of the table, it is possible to make function h **even**. If that were done, what would be the value of $h(-7)$?

Exam: Function Reflections (Practice version 27)

7. A function, f , is **even** if $f(x) = f(-x)$ for all x in the domain. A function, g , is **odd** if $g(x) = -g(-x)$ for all x in the domain.

Let polynomial p be defined with the following equation:

$$p(x) = -x^2 + 1$$

- a. Express $p(-x)$ as a polynomial in standard form.

- b. Express $-p(-x)$ as a polynomial in standard form.

- c. Is polynomial p even, odd, or neither?

- d. Explain how you know the answer to part c.

Exam: Function Reflections (Practice version 27)

8. I have drawn half of a function. Draw the other half to make it even or odd.

9. Let function f be defined with the equation below.

$$f(x) = \frac{x}{3} + 9$$

- a. Evaluate $f(24)$.

- b. Evaluate $f^{-1}(35)$.

Exam: Function Reflections (Practice version 27)

10. The function b is represented by the curve $y = b(x)$ graphed below.

a. Evaluate $b(8)$.

b. Evaluate $b^{-1}(3)$.

Exam: Function Reflections (Practice version 27)

11. Function f is defined by the table below.

a. Complete the columns for $-f(x)$ and $f(-x)$ and $-f(-x)$.

x	$f(x)$	$-f(x)$	$f(-x)$	$-f(-x)$
-2	6			
-1	4			
0	0			
1	-4			
2	6			

b. Is function f even, odd, or neither?

c. How do you know the answer to part b?
