

Name: _____

Date: _____

Exam: Function Reflections (Practice version 11)

1. Let function f be defined by the polynomial below:

$$f(x) = 3x^5 - 2x^4 + 8x^3 + 6x^2 + 5x - 9$$

Draw lines that match each function reflection with its polynomial:

Reflections

$-f(x)$ ●

$f(-x)$ ●

$-f(-x)$ ●

Polynomials

● $-3x^5 - 2x^4 - 8x^3 + 6x^2 - 5x - 9$

● $3x^5 + 2x^4 + 8x^3 - 6x^2 + 5x + 9$

● $-3x^5 + 2x^4 - 8x^3 - 6x^2 - 5x + 9$

2. In each xy plane shown below, a function is graphed with blue. Draw the indicated reflections (as a second curve, indicated in legend) with black (or with whatever you have). The x axis is horizontal and the y axis is vertical (as typical), and the scale is equal on both axes.

Exam: Function Reflections (Practice version 11)

For all questions on this page, the functions f , g , and h are defined by the table below.

x	$f(x)$	$g(x)$	$h(x)$
1	8	3	2
2	4	6	5
3	5	2	6
4	1	7	4
5	6	1	8
6	9	5	7
7	3	8	3
8	2	4	9
9	7	9	1

3. Evaluate $h(2)$.

4. Evaluate $g^{-1}(4)$.

5. By filling more rows of the table, it is possible to make function g **odd**. If that were done, what would be the value of $g(-9)$?

6. By filling more rows of the table, it is possible to make function f **even**. If that were done, what would be the value of $f(-3)$?

Exam: Function Reflections (Practice version 11)

7. A function, f , is **even** if $f(x) = f(-x)$ for all x in the domain. A function, g , is **odd** if $g(x) = -g(-x)$ for all x in the domain.

Let polynomial p be defined with the following equation:

$$p(x) = -x^2 + 1$$

- a. Express $p(-x)$ as a polynomial in standard form.

- b. Express $-p(-x)$ as a polynomial in standard form.

- c. Is polynomial p even, odd, or neither?

- d. Explain how you know the answer to part c.

Exam: Function Reflections (Practice version 11)

8. I have drawn half of a function. Draw the other half to make it even or odd.

9. Let function f be defined with the equation below.

$$f(x) = \frac{x+8}{9}$$

a. Evaluate $f(91)$.

b. Evaluate $f^{-1}(10)$.

Exam: Function Reflections (Practice version 11)

10. The function b is represented by the curve $y = b(x)$ graphed below.

a. Evaluate $b(9)$.

b. Evaluate $b^{-1}(6)$.

Exam: Function Reflections (Practice version 11)

11. Function f is defined by the table below.

a. Complete the columns for $-f(x)$ and $f(-x)$ and $-f(-x)$.

x	$f(x)$	$-f(x)$	$f(-x)$	$-f(-x)$
-2	-6			
-1	-3			
0	0			
1	-3			
2	6			

b. Is function f even, odd, or neither?

c. How do you know the answer to part b?
