Unit-2 Mastery Assessment (version 611)

Question 1 (10 points)

Let f represent a function. If $f[25] = 31$, then there exists a knowable solution to the equation below.

$$y = 2 \cdot f[5(x - 17)] - 30$$

Find the solution.

$$x =$$

$$y =$$

Question 2 (20 points)

Graph the equations accurately. For each integer-integer point on the parent, indicate the corresponding point precisely. Also, with dashed lines, indicate any asymptotes.

$$y = \sqrt[3]{x} - 2$$

$$y = \frac{x^2}{2}$$

$$y = \sqrt[3]{\frac{x}{2}}$$

$$y = 2^{2x}$$

Question 2 continued...

$$y = 2^{-x}$$

$$y = -\sqrt{x}$$

$$y = x^3 + 2$$

$$y = (x - 2)^2$$

$$y = 2 \cdot \sqrt{x}$$

$$y = \log_2(x + 2)$$

Question 3 (20 points)

A function is graphed below.

Indicate the following intervals using interval notation.

| Feature | Where |
|------------|-------|
| Positive | |
| Negative | |
| Increasing | |
| Decreasing | |
| Domain | |
| Range | |

Question 4 (20 points)

Let f represent a function. The curves $b = f[a]$ and $y = \frac{f[\frac{x}{4}-6]-5}{3}$ are represented below in a table and on graphs.

| a | b | x | y |
|-----|------|-----|-----|
| -30 | 2 | -96 | -1 |
| -12 | -100 | -24 | -35 |
| 7 | 89 | 52 | 28 |
| 19 | 8 | 100 | 1 |

- a. Write formulas for calculating x from a and calculating y from b . (Or, write the coordinate transformation formula.)

- b. What geometric transformations (using words like translation, stretch, and shrink), and in what order, would transform the first curve $y = f[x]$ into the second curve $y = \frac{f[\frac{x}{4}-6]-5}{3}$?

Question 5 (10 points)

A parent square-root function is transformed in the following ways:

Horizontal transformations

1. Translate left by distance 1.
2. Horizontal reflection over y axis.

Vertical transformations

1. Vertical stretch by factor 2.
2. Translate down by distance 3.

Resulting graph (and parent function in dashed grey):

- What is the equation for the curve shown above?

Question 6 (20 points)

Make an accurate graph, and describe locations of features.

$$y = \frac{-1}{2} \cdot |x - 6| + 1$$

| Feature | Where |
|------------|-------|
| Domain | |
| Range | |
| Positive | |
| Negative | |
| Increasing | |
| Decreasing | |
