**Unit-2 Reduced Mastery Assessment (version 312)****Question 1 (20 points)**

Graph the equations accurately. For each integer-integer point on the parent, indicate the corresponding point precisely. Also, with dashed lines, indicate any asymptotes.

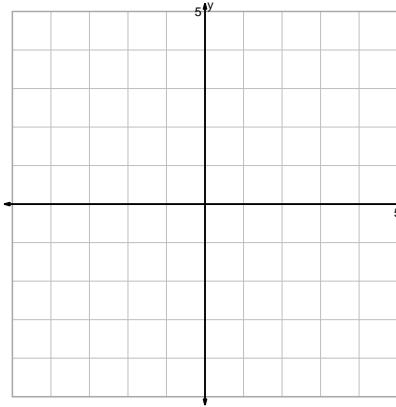

$$y = (x+2)^3$$

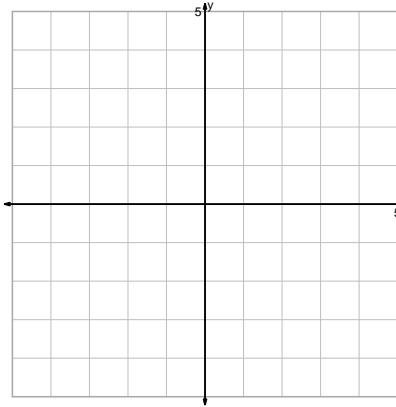

$$y = \log_2(x) + 2$$

$$y = x^2 - 2$$

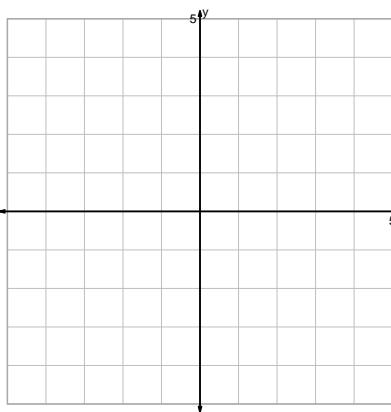

$$y = 2 \cdot \sqrt[3]{x}$$

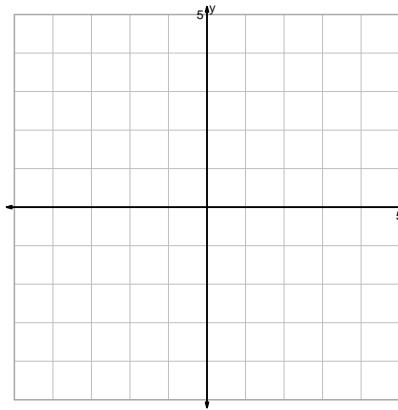

Question 2 continued...

$$y = \log_2(-x)$$

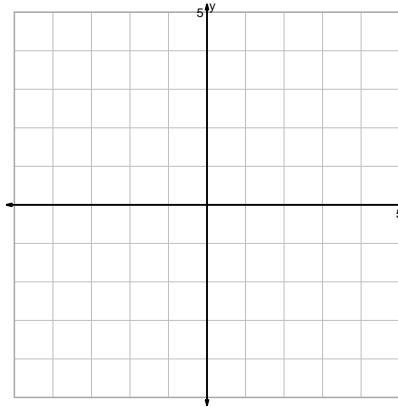

$$y = -2^x$$

$$y = \left(\frac{x}{2}\right)^3$$

$$y = \sqrt[3]{2x}$$

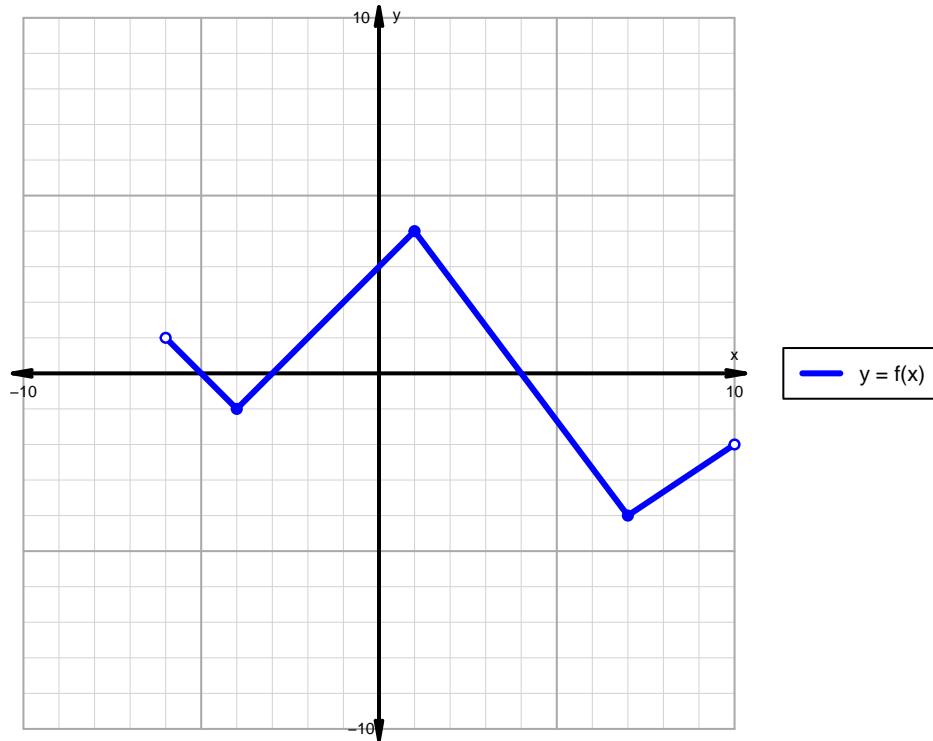

$$y = \frac{\sqrt{x}}{2}$$

$$y = 2^{x-2}$$

**Question 2 (20 points)**

A function is graphed below.

Indicate the following intervals using interval notation.

Feature	Where
Positive	
Negative	
Increasing	
Decreasing	
Domain	
Range
