Intervals, Transformations, and Slope Practice (version 78)

1. The function f is graphed below.

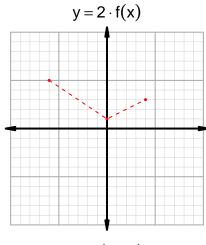

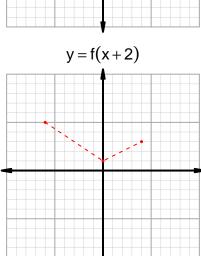

Indicate the following intervals using interval notation. Remember, you can use \cup between two intervals to indicate the union. Except for range, all intervals will indicate x values; this is standard.

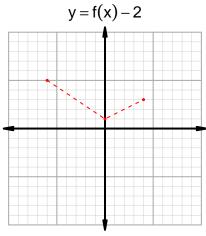

| Feature | Where |
|------------|-------|
| Positive | |
| | |
| Negative | |
| | |
| Increasing | |
| | |
| Decreasing | |
| | |
| Domain | |
| | |
| Range | |
| | |
| | |

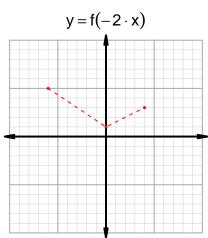

Intervals, Transformations, and Slope Practice (version 78)

2. In the four graphs below, y = f(x) is graphed as a dotted line. With a solid line, please graph the transformations indicated by the equations below.

3. Let function g be defined by the table below. Use the formula $\frac{g(x_2)-g(x_1)}{x_2-x_1}$ to find the average rate of change between $x_1=15$ and $x_2=30$. Express your answer as a reduced fraction.

| \overline{x} | g(x) |
|----------------|------|
| 15 | 95 |
| 30 | 68 |
| 68 | 15 |
| 95 | 30 |
