p1028a: Box multiplication for two-digit integers (v11)

Example

Without a calculator, use the box method to multiply 63 and 24.

*	60	3
20	1200	60
4	240	12

1200
60
240
+ 12
———
1512

Question 1

Without a calculator, use the box method to multiply 39 and 27.

*	30	9
20	600	180
7	210	63

600
180
210
+ 63
———
1053

Question 2

Without a calculator, use the box method to multiply 65 and 78.

*	60	5
70	4200	350
8	480	40

4200
350
480
+ 40
———
5070

Question 3

Without a calculator, use the box method to multiply 67 and 89.

*	60	7
80	4800	560
9	540	63

4800
560
540
+ 63
———
5963
