p1028a: Box multiplication for two-digit integers (v17)

Example

Without a calculator, use the box method to multiply 63 and 24.

*	60	3
20	1200	60
4	240	12

1200
60
240
+   12
———
1512

Question 1

Without a calculator, use the box method to multiply 32 and 75.

*	30	2
70	2100	140
5	150	10

2100
140
150
+   10
———
2400

Question 2

Without a calculator, use the box method to multiply 89 and 63.

*	80	9
60	4800	540
3	240	27

4800
540
240
+ 27
———
5607

Question 3

Without a calculator, use the box method to multiply 78 and 25.

*	70	8
20	1400	160
5	350	40

1400
160
350
+ 40
———
1950
