p1028a: Box multiplication for two-digit integers (v14)

Example

Without a calculator, use the box method to multiply 63 and 24.

*	60	3
20	1200	60
4	240	12

1200
60
240
+ 12
───────
1512

Question 1

Without a calculator, use the box method to multiply 29 and 45.

*	20	9
40	800	360
5	100	45

800
360
100
+ 45
───────
1305

Question 2

Without a calculator, use the box method to multiply 47 and 85.

*	40	7
80	3200	560
5	200	35

3200
560
200
+ 35
———
3995

Question 3

Without a calculator, use the box method to multiply 38 and 27.

*	30	8
20	600	160
7	210	56

600
160
210
+ 56
———
1026
