Check if Relation is a Function (12 pts classwork, version 32)

1. A relation is expressed as a list of (x, y) ordered pairs.

$$(1, 9) \quad (3, 6) \quad (7, 6) \quad (6, 4) \quad (6, 4) \quad (9, 5)$$

- Is this list consistent with y being a function of x? Why or why not?

yes

- Is this list consistent with x being a function of y? Why or why not?

no

- Is this list consistent with a one-to-one function? Why or why not?

no

2. A relation is shown as points on a graph.

- Is this relation consistent with y being a function of x? Why or why not?

yes

- Is this relation consistent with x being a function of y? Why or why not?

no

- Is this relation consistent with a one-to-one function? Why or why not?

no

Check if Relation is a Function (version 32)

3. A relation is shown with segments connecting elements of two sets.

- Is this relation consistent with y being a function of x? Why or why not?

yes

- Is this relation consistent with x being a function of y? Why or why not?

yes

- Is this relation consistent with a one-to-one function? Why or why not?

yes

---

4. A relation is shown as a curve plotted on an x, y

- Is this relation consistent with y being a function of x? Why or why not?

no

- Is this relation consistent with x being a function of y? Why or why not?

no

- Is this relation consistent with a one-to-one function? Why or why not?

no
